

ABBOTT IN ARABIA

Founded by Dr. Wallace C. Abbott in 1888, Abbott has been dedicated to fulfilling the promise of human potential. Today, 94,000 people in more than 150 countries are working at Abbott to make a lasting impact on health. By creating breakthrough products in diagnostics, medical devices, nutrition and branded generic pharmaceuticals, Abbott helps people and communities live their best lives.

Abbott is proud to be part of the societal fabric in the Arab world. Our presence in the region spans more than 75 years, employing nearly 1,000 people, including graduates through Abbott's Interns program.

Abbott takes pride in working closely with local communities. Our successes are intertwined. The company is committed to addressing malnutrition, water conservation and supporting healthy initiatives for the community.
